Chapter 1: Template

[Last edit: Sept, 2022] Abstract—This document describes the most common article elements and how to use the IEEEtran class with Last to produce files that are suitable for submission to the Institute of Electrical and Electronics Engineers (IEEE). IEEEtran can produce conference, journal and technical note (correspondence) papers with a suitable choice of class options.

Index Terms—Class, IEEEtran, \LaTeX , paper, style, template, typesetting.

I. INTRODUCTION

T NTRODUDUCTION starts here

A. Definitions

Here, we will define [1] as in Figure 1.

Fig. 1. A Caption

1) Levels:

Level.1 ABC

Level.2 Something

Level.3 Repeat Level.2

II. MOTIVATION

III. BACKGROUND

Here we will write about backgrounds

A. Types of visual grasping

surveys on different types of grasping approacches

- 1) 6-D pose grasping:
- B. SLAM
 - 1) Kimera:

IV. OUR METHODS

- A. Conceptual Architecture
 - 1) Problem Definition and Input Space:

$$\hat{\xi} = \begin{bmatrix} \hat{\omega} & v \\ 0 & 0 \end{bmatrix}, \quad \hat{\omega} = \begin{bmatrix} \omega_1 \\ \omega_2 \\ \omega_3 \end{bmatrix}^{\wedge} = \begin{bmatrix} 0 & -\omega_3 & \omega_2 \\ \omega_3 & 0 & -\omega_1 \\ -\omega_2 & \omega_1 & 0 \end{bmatrix} \quad (1)$$

V. IMPLEMENTATION

GLOSSARY

SLAM Simultaneous Localization and Mapping. 1, 2 **SOTA** State-Of-The-Art. 1
